How can we use the abundant natural resources and add more value to their lives. This was my purpose calling and I have spent my adult life in the business of adding value to Indonesian natural resources. After a few days in Sumba, I was reenergized and felt the urge to start a new journey. This new endeavor will be different. This time I intended to bring more power to the smallholders and farmers in creating a sustainable chain that can give value and impact on their lives. And I named this enterprise Talasi which in sanskrit depicts trees that always bear flowers, fruits and new leaves, and a sweet fragrance or cornflower in Latin America. Talasi is about exploring and discovering the potential in the obscurity. Talasi is about setting up and operating at the Origin. Talasi is about working with the community, providing them with knowledge, skills and tools.

It has the following components EZSwitchSetup wizard on the installation CD EZSwitchSetup switch configuration wizard EZSwitchSetup switch manager Figure 1 illustrates the highlevel workflow of EZSwitchSetup. FIGURE 1 EZSwitchSetup Components Chapter 2, Setting Up Your Switch, describes how to use the EZSwitchSetup wizard and Switch Configuration to set up and configure your switch for the first time. For additional information about your switch, see the hardware reference manual included on the Brocade Documentation CD, which ships with the switch. Chapter 3, Managing Your Switch, describes how to use the Switch Manager to monitor and manage your switch. NOTE Although your switch may have advanced capabilities, EZSwitchSetup is for a singleswitch fabric with FC ports only. To configure and manage other features on your switch, use the command line interface, Web Tools, or DCFM. EZSwitchSetup Administrator s Guide 1 14 1 EZSwitchSetup software and hardware requirements EZSwitchSetup software and hardware requirements You can run EZSwitchSetup on a SAN host computer or you can use a different computer that is not part of the SAN, such as a laptop. EZSwitchSetup requires a browser that conforms to HTML version 4.0, JavaScript version 1.0, and Java Plugin or higher. The EZSwitchSetup installation CD automatically installs the correct Java Runtime Environment JRE. This does not affect any preinstalled JREs. The minimum hardware requirements for a Windows system are as follows 90 MB of hard drive space for the EZSS installation directory.

256 MB or more RAM for fabrics containing up to 15 switches. A minimum of 8 MB of video RAM is also recommended. An Ethernet port. A serial COM port, if you plan to connect to the serial port on the switch. Configuring Internet Explorer Correct operation of EZSwitchSetup Switch Manager with Internet Explorer requires specifying the appropriate settings for browser refresh frequency and process model. FIGURE 2 Configuring Internet Explorer Supported switches You can use EZSwitchSetup with the following switches Brocade 300 switch Brocade 4100 switch Brocade 4900 switch Brocade 5000 switch Brocade 5100 switch Brocade 5300 switch Brocade 7800 switch Brocade 8000 switch Your switch must meet the following requirements It must be connected to an Ethernet LAN that is accessible by the host. If it is not, the system issues the message Page not Found. It must be running Fabric OS v It must have licensed ports. If the switch has no licensed FC ports, you must first install a POD license and then enable the affected ports. It must be in a singleswitch fabric. You cannot use EZSwitchSetup to manage a switch that has any of the following features enabled Virtual Fabrics with nondefault logical switches Access Gateway Userdefined Admin Domains You can, however, use the EZSwitchSetup wizard to discover the switches and set their IP address. Language support for EZSwitchSetup The EZSwitchSetup wizard and the Switch Manager interface display the following languages English default Brazilian Portuguese French

German Italian Japanese Korean Simplified Chinese Spanish Traditional Chinese When you launch EZSwitchSetup, the interface detects the operating system and language environment and installs and displays the appropriate language. For example, if you set up the switch using a German operating system, EZSwitchSetup installs the German language interface and displays text, messages, and labels in that language.

If localization resources are not fully available in the user host environment, EZSwitchSetup uses the default language, English. Regardless of the local language, the following is displayed in English

User input, which must consist of printable ASCII characters

Switchbased information such as
